

Campus Safety, Security, and Communications - Unified

MESSAGENET CONNECTIONS MASS NOTIFICATION SYSTEM

MessageNet Connections is an integrated system that unifies safety and security systems with everyday and emergency communications systems using the technologies you already have to form a powerful mass notification system that leverages the spectrum of devices found in the school.

Private Communications Devices

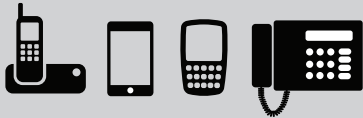

Computer Pop-Ups

pop-up messages scroll on the screens of network PCs and Macs.

Smartphone

Telephones

supports desk/cell phones, voice-mail, auto dial directory, and SMS texting. Messages can be received by phone.

E-Mail

messages can be sent from Connections to any internal or external user.

Text Messaging & Paging

supports commercial, in-house, and two-way pagers as well as PDA's. Pager voice-mail and customizable paging applications available. Support for Vocera badges, RSS and Twitter.

Panic Buttons & Detectors

supports a variety of wireless duress/panic buttons, door and window open detectors, and smoke/motion detectors. Also supports wireless IP cameras and interfaces to fire and alarm systems.

Two Way Radios

messages can be delivered on your two way radio.

Controls Philips Hue LED lighting

wirelessly, providing cost-effective building- and campus-scale warning and signaling.

Public Communications Devices

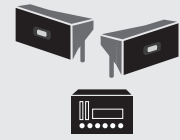

OMNI: Safety, Security & Communications

Wireless device with PA, clock, camera, speakers, text, video, and more All-in-one.

Video Cameras & Surveillance

Real-time, event-driven, live and recorded video, including user-initiated surveillance and video conferencing.

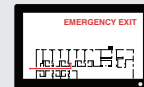

PA Systems, VoIP and Analog

a front end that provides new intercom features such as text-to-intercom, log-on controls, message scheduling, and logging. Multiple PA systems controlled at one time.

Fire Panel Integration

integrates with industry-standard fire panels to receive and process real-time information and send messages accordingly.

LCD and Digital Signage

an integrated multimedia communication alert panel with the capability to deliver web content, Power Points, and audio and visual messaging. Evacuation routes. Can also schedule and deliver locally stored video content and broadcast TV content.

PoE Audio-Visual and LED signs

displays alerts and messages with scrolling text, flashing lights, and audio PA.

LED Electronic Signs

provides organization-wide outdoor and indoor visual PA features. Can support thousands of electronic signs on your LAN and WAN.
